SINGLE POLE LIGHTNING PROTECTION

Safeguard your animal management electric fence energiser against lightning-related voltage surges with the Nemtek Single Pole Lightning Diverter. Designed to provide added protection during electrical storms, this compact device diverts excess high-voltage energy away from the energiser and into the earthing system. By reducing the risk of surge-related damage, it helps support reliable fence operation and continuous perimeter security when severe weather strikes.

Features:

- Built-in lightning inhibitor, inhibits lightning from getting to the energizer.
- Built-in lightning diverter, diverts the lightning from the energizer to the earth spikes
- Suitable for outdoor use near the fence

Specifications:

Material Stainless steel components for long life
UV stabilised plastic housing
