

STRANDED STAINLESS STEEL WIRE

Stranded Stainless Steel Wire offers a higher resistance to corrosive environments and a longer life span on the fence. The 316 grade is the wire of choice for highly corrosive coastal areas. The flexibility offered by the stranded wire construction makes working with this wire easier during installation and results in a neat clean look on the fence without compromising the fence's performance.

Features:

- Easy to work with stranded wires
- Stainless steel grade 304 can be used in most corrosive environments and near the coast (+50km from coastline)
- Stainless steel grade 316 can be used in most harsh corrosive environments and on the coast (+0.1km from coastline)
- High in tensile strength which is harder to cut

Specifications:

Material	304 Stainless steel 316 Stainless steel
Construction	Stranded
Tensile breaking strength	110kg
Safe working load	20%: 22kg

Stock Code	Description
EW-TSS304/8	1.2mm AISI304 Stranded stainless steel wire 800m
EW-TSS304/16	1.2mm AISI304 Stranded Stainless Steel Wire 1600m
EW-TSS316	1.2mm AISI316 Stranded stainless steel wire 800m
