

STRAIN INSULATOR

The Strain Insulators are used to isolate the wire from the corner post, on the opposite side of the tensioners. There are three options available: Jumbo, Ultra and Ultra Hardened

Features:

- Ultra Strain Insulator
 - Suitable for fences using up to 2.0mm wire
 - Operating tension of 25kg
 - Larger tracking distance to reduce power loss and arcing
 - Suitable for medium-tensioned fences
- Ultra Hardened Strain Insulator
 - Suitable for fences using up to 3.0mm wire
 - Operating tension of 140kg
 - Larger tracking distance to reduce power loss and arcing
 - Suitable for high-tensioned fences

Specifications:

Material	UV stabilised plastic
Colour	Black
	White
Operating temperature	-40 to 80°C
Operating voltage	0 - 12KV
Recycling	SPI 2
