FERRULES

Ferrules are used to join the conductive electric fence wires permanently. This is a high security wire connection because it cannot be removed.

Available in:

Tinned Copper:

- 6mm is used with the galvanised 1.2mm wire
- 10mm is used with the galvanised 1.6mm and 2.0mm wires
- 16mm is used with the galvanised 2.24mm wire

Aluminium:

- 6mm is used with the 1.6mm aluminium wire
- 10mm is used with the 2.0mm and 2.5mm aluminium wire

304 Stainless Steel:

- 6mm is used with 1.0mm and 1.2mm stainless steel wires
- 10mm is used with 1.6mm and 2.0mm stainless steel wires

Specifications:

Diameter	6mm
	10mm
	16mm
Material	Aluminium
	Stainless Steel
	Tinned Copper
Packaging	50 Pack
	100 Pack

Stock Code	Description
EA-F6AFT	6mm Aluminium Ferrules (bag of 100)
EA-F6S	6mm Tinned Copper Ferrules (bag of 100)
EA-F6S/SS	6mm 304 Stainless Steel Ferrules (bag of 50)
EA-F10AFT	10mm Aluminium Ferrules (bag of 100)
EA-F10	10mm Tinned Copper Ferrules (bag of 100)
EA-F10S/SS	10mm 304 Stainless Steel Ferrules (bag of 50)
EA-F16	16mm Tinned Copper Ferrules (bag of 100)
