3-WAY GATE CONTACT

The 3-way gate contact is used for wiring live wires in series onto a sliding gate. The third insulated connector can be used to bring the earth wire onto the gate system. The robust construction using stainless steel and brass, makes it suitable for outdoor use in most climates. The large location plates allow for increased tolerance and easier installation.

Features:

- Effective short to earth detection over sliding gates
- Heavy duty design for all weather types
- 2 live and 1 earth connectors with lugs
- Available with brass cable connectors or crimp lug connectors
- Large location plates allow for increased tolerance
- Mounting bracket available

Specifications:

Material	Brass Stainless Steel UV stabilised Nylon
Dimensions	Dimensions of Part 1: 80(L) x 60(H) x 140(D)mm Dimensions of Part 2: 95(L) x 60(H) x 140(D)mm
